Routes of Exposure

Symptoms Summary

Acute toxicity: **Sodium lauryl sulfate** Sodium lauryl sulfate appears to be safe in formulations designed for discontinuous, brief use followed by thorough rinsing from the surface of the skin. Document Number: RISK LINE/1987050008
Lauryl Alcohol Ethoxylate: Ethoxylates with alkyl chains in the C12-18 range, being moderately acutely toxic by the oral route. By the dermal route - the relevant route of human exposure - it is not expected to produce skin irritation or systemic or reproductive toxicity at concentrations used in formulated cleaning products
Cocamidopropylamine Oxide: Cocamidopropylamine Oxide solution was not a primary dermal irritant, not a sensitizer, although it did produce some reactions typical of mild irritation PMID: 18569162 [PubMed - indexed for MEDLINE].
Alkylpolyglucoside: Clinical tests of products containing alkyl glucoside ingredients have found that the products were not dermal irritants or sensitizers. According to the general provisions of the Cosmetics Regulation of the European Union

Skin Contact	No problems reported
Skin Absorption	Unlikely
Eye Contact	May cause irritation or redness
Inhalation Acute	Unlikely

Section 12: Ecological Information

General Ecological information:

Sodium lauryl sulfate is readily biodegradable under aerobic and anaerobic conditions and, therefore, does not persist in the environment.^{8,37,45} SLS is considered a sustainable material because of its 100% bio-based content, biodegradability, and low potential to bioaccumulation.

Lauryl Alcohol Ethoxylate products starting from natural source are very quickly and easily degradable with degradability over 90% according to OECD test.

Cocamidopropylamine Oxide: Readily biodegradable (according to OECD criteria).

Alkylpolyglucoside Activated sludge, non-adapted, OECD Guideline 301E, readily biodegradable, 88% after 28day (DOC removal).

Section 13: Disposal Considerations

Waste disposal of the product;

Containerize minor spills for reuse where possible.

Larger quantities are disposed of according to local and municipal regulations

Section 14: Transport Information

General Information:

Not regulated according Canada Transport of Dangerous Goods
